AUTOMATED DOCUMENT VERIFICATION: STREAMLINING ONLINE FORMS

Motivation & Introduction

- Automating document classification for efficiency and accuracy.
- Reducing manual effort in identifying document types.

Methodology

- Preprocess images.
- Use ResNet-18 for feature extraction and classification.
- Display results to the user.

Outcomes and Findings

- Accurate classification of government and custom documents.
- User-friendly, reliable system tested by uploading different images.

Success!

Your documents were uploaded successfully.

Objectives

- Classify documents like Aadhar, PAN, etc., using ResNet-18.
- Ensure high accuracy and user-friendly implementation.

Results

Welcome! press for fill the form
